Specific agenda points  Candidate photograph may be inserted at the top right corner of this page	Following are my Agenda Points:  1. Having contributed as Secretary and Treasurer, I consider that EC needs a strong and balanced representation as well, so that the appropriate decisions are well-supported and there is no 'red-tapism' in the execution of those decisions.  2. There is a need to add value to the Society, which has to be done through a better and more interactive website, vibrant social media presence and online features which are of International standards. I shall make this a primary agenda and work towards it.  3. SNMI Guidelines was the initiative which was started during my Secretarial tenure and there was progress made, however this needs to be taken to a logical conclusion and I would like to continue this unfinished work of mine as EC member.

	<p>4. I consider SNM India as a continuously expanding family wherein new members are coming in. My purpose of being a part of EC is to provide the right support to the leadership so that Members, especially the new ones, are well-represented.</p>

### Save Nuclear Medicine

1. To Stop Classification of PET/CT under Radiology\*: Many government health departments have categorized PET/CT procedures under the domain of Radiology, which may lead to Radiologists taking over these diagnostic techniques. This classification may not accurately represent the expertise and unique role that Nuclear Medicine specialists play in interpreting and using PET/CT scans for diagnosing and treating various medical conditions.

2. To stop classification of Radionuclide Therapies under Radiation Oncology\*: Similarly, the classification of Radionuclide therapies as part of Radiation Oncology in programs like Ayushman Bharat can result in Radiation Oncologists performing treatments that traditionally fall within the purview of Nuclear Medicine. This misclassification can create confusion and competition between these two specialties, potentially compromising patient care.

3. \*Personal Experience and Nationwide Issue\*: My personal experience in Delhi highlights the fact that many Nuclear Medicine practitioners across India may be facing similar challenges. These challenges can include legal disputes, administrative hurdles, and competition for patients. Your aim is to raise awareness of these issues to ensure that Nuclear Medicine specialists can provide optimal patient care without unnecessary obstacles.

In summary, my goal is to advocate for the proper recognition and classification of Nuclear Medicine procedures and therapies, preventing the encroachment of other medical specialties, and ultimately ensuring that patients receive the best possible care from Nuclear Medicine specialists without legal, administrative, or competitive hindrances.
